New SmartWater Makeover

saves you money
& conserves water!

Get the 2C's
Convenience and Conservation!

The loss of water while waiting for it to get hot is on average 3 to 7 gallons. With your makeover there will be no more waiting!

CleanTech Energy Solutions is offering an easy, affordable SmartWater Makeover to help you:

- save money on water — an average family of four saves up to 25,000 gallons of water annually
- save energy by heating less water — lowering your gas or energy bill
- lower your carbon footprint
- extend the life of your water heater
- reduce air and sewage pollution
- and so much more!

**Starting
at just
\$399!**

Easily installed in new and existing homes!

**Call us today to
start saving money on
your water and energy bills!**

SmartWater Makeover Kit

Starting at **\$399** + tax

Save \$100 - \$200/yr in water fees & \$100 - \$200/yr in heating costs!

Kit includes:

1 ea. Watts Premier Recirculating System *

Watts Premier's Hot Water Recirculation Pump brings convenience and saving to your home, **giving you hot water instantly at every faucet, when you need it.** This unique product not only provides you with the convenience of hot water when you need it, but **saves up to 15,000 gallons per year.**

*Not suitable for tankless water heaters

Additional Watts Sensor Valve Kit (Required for most 2 story homes)

Additional sensor valve for branched hot water line.

Kit includes sensor valve and 2-12 inch supply lines with fittings. If your home has a branched hot water lines simply add additional sensor valves to your system. No additional pumps are needed.

2 ea. Earth Massage 1.5 GPM Shower Heads (White or Chrome)

Flowcontrol technology: greater force at low pressure!

Conserves water and saves money while enhancing pressure, performance and appearance! 9-jet turbo massage is adjustable: gentle needle spray to forceful jet. Consistent flow rate regardless of water pressure.

Saves 20% more water and energy than a standard 2.5 GPM showerhead - that's 3,650 gallons of water (per person) annually!

Non-aerating spray means less temperature loss with maximum energy savings. Self-cleaning and maintenance-free. Meets or exceeds ANSI specifications.

“Come Clean, Go Solar”

4 ea. 1.0 GPM Dual-Thread Faucet Aerators for the Bathrooms and Kitchen

Innovative, dual-thread system to accommodate both male and female applications **Saves 55% more water and energy than a standard 2.2 GPM aerator – that's 13,140 gallons of water annually!** Housing constructed of solid brass with highly polished chrome finish and includes housing, flow control, tamperproof screen, and all other parts necessary for proper installation and operation. Provides an even spray pattern and has a 10-year guarantee. Meets or exceeds ASME standards and is California Energy Commission-certified

Bathroom and kitchen aerators don't just save water; they also reduce the natural gas and electricity cost involved with water heating. **Aerators coupled with water saving shower heads can reduce the average homes hot water usage by as much as 50%.**

3 ea. Toilet Tank Banks

Worry-free water savings for the lifetime of the toilet. Patented air lock and fill valve – no water evaporation which means the bag never needs refilling. Every flush saves water - up to 0.8 gallons per flush! Maintenance-free. Constructed of non-corrosive materials that resist microbes and fungal growth. **Save up to 4,000 gallons of water per year.**

3 ea. Fill Cycle Diverters

Saves up to 75% of the fill cycle water – up to ½ gallon per flush. The adjustable fill tank cycle diverter takes excess water from bowl and diverts it to the tank to reduce excess water consumption. **Save up to 2,700 gallons of water per year.**
